

A step ahead of existing ladder systems.

Kwikstage Scaffold's Aluminium Stairway has been designed to **increase safety and access** on site. Its lightweight construction makes for easy installation into existing scaffold systems to provide an internal stairway, complete with handrails, **over half-a-metre wide!** Each unit rises 1.5 vertical metres in one 2.4 bay – ensuring that the angle of ascent and descent is comfortable for all users – and by using mesh panels it's possible to fully enclose the stairway for even greater safety.

The advantages of Kwikstage Scaffold's Aluminium Stairway are many and obvious –

- personnel can move around the site quicker and easier
- site safety is increased – both for those using the stairway and those below
- access is greatly improved – important when equipment has to be carried
- erecting and dismantling are fast and simple processes.

Specify Aluminium Stairways – from Kwikstage Scaffolds – the right step for the right reasons.

Decription	Dimension	Finish	Mass	Estimating Data
Stairway 1.5m	2.8 metres long 0.564 m wide	Aluminium	21kg	One unit rises 1.5 vertical metres in one 2.4m bay
Vertical Handrail		H.D.G.	5.7kg	One per Stairway unit minus one from total
Top Handrail		H.D.G.	16.2kg	One per Stairway Tower
